

Ipotane Saddle Features

Interchangeable Trees

Personal Trees for each athlete mean no compromising for either in security and comfort

Recyclable

We use materials that can be recycled, because it matters!

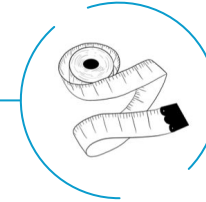

Light Weight

Made from Nylon 6, the Ipotane Saddle is one of the lightest on the market

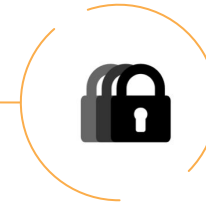

Completely Custom Measurements

Both Horse and Rider get trees made to their unique size and shape

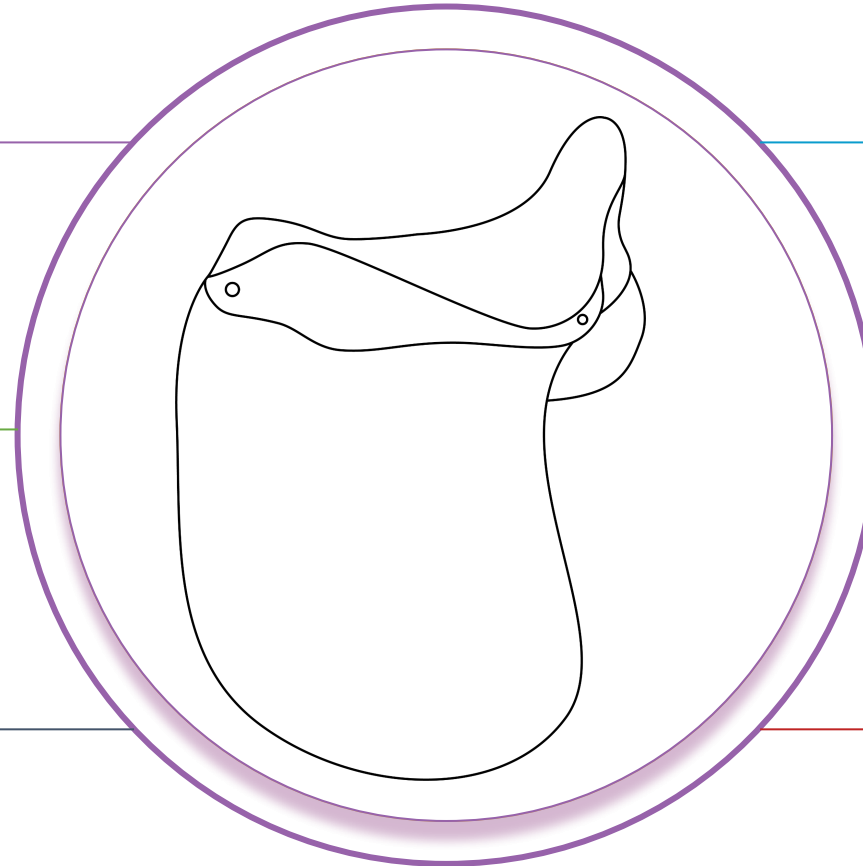

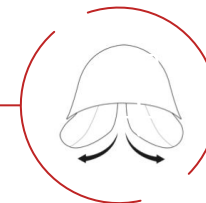

Triple Lock Connectivity

Horse and Rider Trees lock into position quickly and securely

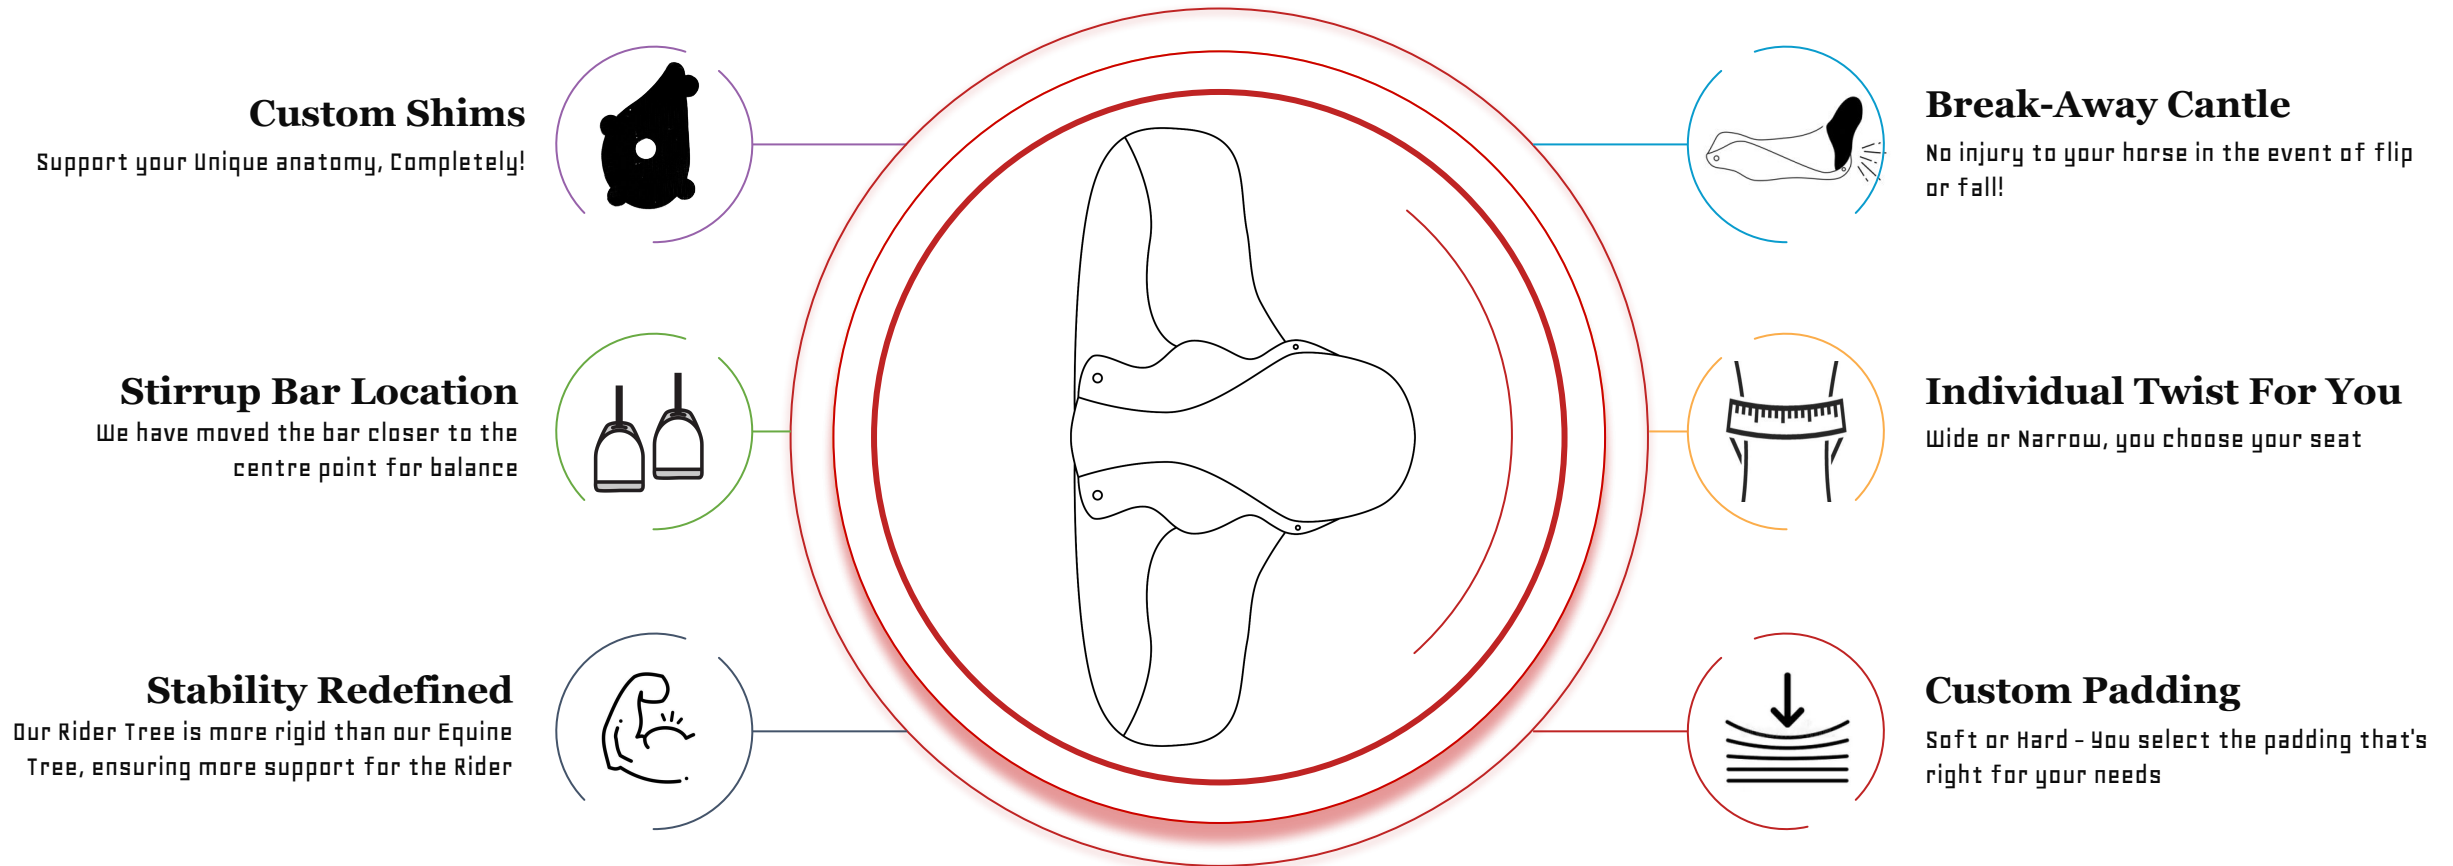

Force Spread

Our saddle is designed to work WITH physics to reduce pressure on your horse

Rider Tree Features

Equine Tree Features

No Bridge over Wither

No obstruction to the horses movement

Fan Flared Points

We don't like pointy metal ends, and neither do horses

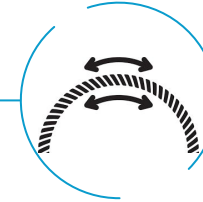

Flexible Gullet Bar

Allowing your horse to move freely without sacrificing rider stability

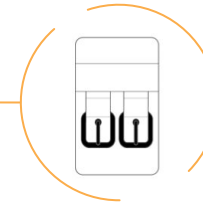

Flexible Tree

The Equine tree is more flexible than the Rider tree because your horses' ability to move matters most!

Adjustable Girth Options

You choose what works best for you

Knee Block Location

Adjustable to secure your leg in the ideal position
